TRIUMPH
HEALTHCARE 

EVERY LIFE
improved.

Turn to **Triumph** for *Long-Term Acute Care.*

Long Term Acute Care (LTAC) hospitals are a vital resource for medically complex, chronically ill, or catastrophically injured patients for whom short-term acute care is no longer viable. The average length of stay for an LTAC patient ranges from a few days to several weeks. If you or a loved one requires this level of specialized care, turn to one of the nation's largest and leading LTAC organizations. Triumph HealthCare.

All Triumph locations are hospital licensed, JCAHO accredited, and Medicare Certified. We frequently admit patients directly from hospital intensive care units, and our staff is equipped to provide critical care interventions when necessary. Triumph hospitals feature the latest in acute care innovations, protocols, and practices. We are focused on facilitating positive outcomes through customized care plans and constant, compassionate patient interaction.

While in our care, patients are treated with dignity, respect and compassion. We believe in involving the family in the care process as well. From treatment plans to discharge details, our case managers work with the patient and the family to make the Triumph experience as pleasant and uncomplicated as possible.
